CONTENTS

NUMBER 1

D. L. Wright, Jr. — 1 Retrieval of optical properties of atmospheric aerosols from moments of the particle size distribution

P. C. Raynor and D. Leith — 19 The influence of accumulated liquid on fibrous filter performance

T. E. Corcoran, R. Hitron, W. Humphrey and N. Chigier — 35 Optical measurement of nebulizer sprays: a quantitative comparison of diffraction, phase doppler interferometry, and time of flight techniques

J. C. Barrett — 51 Timescales for nucleation and growth in supersaturated vapour–gas mixtures

R. P. A. Hartman, D. J. Brunner, D. M. A. Camelot, J. C. M. Marijnissen and B. Scarlett — 65 Jet break-up in electrohydrodynamic atomization in the cone-jet mode

R. G. Forbes — 97 Liquid-metal ion sources and electrosprays operating in cone-jet mode: some theoretical comparisons and comments

I. W. Lenggoro, K. Okuyama, J. Fernández de la Mora and N. Tohge — 121 Preparation of ZnS nanoparticles by electrospray pyrolysis

137 Abstracts of the French Aerosol Meeting CFA 98

NUMBER 2

A. D. Maynard — 151 A simple model of axial flow cyclone performance under laminar flow conditions

V. Aizenberg, S. A. Grinshpun, K. Willeke, J. Smith and P. A. Baron — 169 Measurement of the sampling efficiency of personal inhalable aerosol samplers using a simplified protocol

D. L. Johnson, N. A. Esmen, K. D. Carlson, T. A. Pearce and B. N. Thomas — 181 Aerodynamic behavior of lipid microtubule aerosols

C.-T. Lee and W.-C. Hsu — 189 The measurement of liquid water mass associated with collected hygroscopic particles

G. Lidén, L. Juringe and A. Gudmundsson — 199 Workplace validation of a laboratory evaluation test of samplers for inhalable and "total" dust

R. Lange, H. Fissan and A. Schmidt-Ott — 221 A new method for the determination of the interception equivalent diameter

M. Alonso, F. J. Alguacil and Y. Kousaka — 233 Space–charge effects in the differential mobility analyzer

M. Marjamäki, J. Keskinen, D.-R. Chen and D. Y. H. Pui — 249 Performance evaluation of the electrical low-pressure impactor (ELPI)

M. Folmsbee, K. Strevett, K. Stafford and C. Evenson — 263 The effect of sampling time on the total efficiency of the Andersen microbial sampler: a field study

NUMBER 3

D. E. Rosner and Y. F. Khalil — 273 Particle morphology- and Knudsen transition-effects on thermophoretically dominated total mass deposition rates from "coagulation-aged" aerosol population

A. Soldati — 293 On the effects of electrohydrodynamic flows and turbulence on aerosol transport and collection in wire-plate electrostatic precipitators

M. L. Laucks, G. Roll, G. Schweiger and E. J. Davis — 307 Physical and chemical (Raman) characterization of bioaerosols—pollen

K. Eleftheriadis and I. Colbeck — 321 The fractionation of atmospheric coarse aerosol by a tunnel sampler employing single stage impactors

J. Malet, L. Alloul, N. Michielsen, D. Boulaud and A. Renoux — 335 Deposition of nanosized particles in cylindrical tubes under laminar and turbulent flow conditions

V.-M. Kerminen, C. Ojanen, T. Pakkanen, R. Hillamo, M. Aurela and J. Meriläinen — 349 Low-molecular-weight dicarboxylic acids in an urban and rural atmosphere

C. F. Clement and R. G. Harrison — 363 Enhanced localised charging of radioactive aerosols

N. O. Breum — 379 The dust holding capacity of porous plastic foam used in particle size-selective sampling

387 Book Reviews

NUMBER 4

R. P. Camata, M. Hirasawa, K. Okuyama and K. Takeuchi — 391 Observation of aerosol formation during laser ablation using a low-pressure differential mobility analyzer

Z. D. Ristovski, L. Morawska, J. Hitchins, S. Thomas, C. Greenaway and D. Gilbert — 403 Particle emissions from compressed natural gas engines

B. Franz, T. Eckhardt, T. Kauffeldt and P. Roth — 415 H_2O_2 addition to diesel engine exhaust gas and its effect on particles

M. Kostoglou and A. G. Konstandopoulos — 427 Particulate deposit shape evolution on cylinders in cross-flow at high Stokes numbers

S. Kojevnikova and Y. Zimmels — 437 Mechanism of collection of aerosols by an array of oppositely charged drops

A. C. K. Lai and W. W. Nazaroff — 463 Modeling indoor particle deposition from turbulent flow onto smooth surfaces

A. Schwarzenböck and J. Heintzenberg — 477 Cut size minimization and cloud element break-up in a ground-based CVI

J. W. Lee, D. Y. Lee and W. S. Kim — 491 Dispersion of an aerosol bolus in a double bifurcation

507 Erratum

NUMBER 5

S. N. Dubtsov, A. I. Levykin and K. K. Sabelfeld — 509 Kinetics of aerosol formation during tungsten hexacarbonyl photolysis

Y. Kousaka, T. Nomura, M. Alonso, M. Nishio and E. Tenjiku — 519 Experimental studies on gas-phase nucleation and the effect of seed particles on homogeneous nucleation suppression

J. Pyykönen and J. Jokiniemi — 531 Computational fluid dynamics based sectional aerosol modelling schemes

M. Polat, H. Polat and S. Chander — 551 Electrostatic charge on spray droplets of aqueous surfactant solutions

M. B. Ray, A. C. Hoffmann and R. S. Postma — 563 Performance of different analytical methods in evaluating grade efficiency of centrifugal separators

X. Li, P. F. Dunn and R. M. Brach — 583 Experimental and numerical studies of microsphere oblique impact with planar surfaces

J. M. Mäkelä, I. K. Koponen, P. Aalto and M. Kulmala — 595 One-year data of submicron size modes of tropospheric background aerosol in Southern Finland

M. Ebert, S. Weinbruch, P. Hoffmann and H. M. Ortner — 613 Chemical characterization of North Sea aerosol particles

NUMBER 6

J. C. Barrett and T. J. Baldwin — 633 Aerosol nucleation and growth during laminar tube flow: maximum saturations and nucleation rates

A. A. Lushnikov and M. Kulmala — 651 Foreign aerosol in nucleating vapour

L. Krämer, U. Pöschl and R. Niessner — 673 Microstructural rearrangement of sodium chloride condensation aerosol particles on interaction with water vapor

V. E. Cachorro, P. Durán, R. Vergaz and A. M. de Frutos — 687 Measurements of the atmospheric turbidity of the north-centre continental area in Spain: spectral aerosol optical depth and Ångström turbidity parameters

G. Ziskind, M. Fichman and C. Gutfinger — 703 Particle behavior on surfaces subjected to external excitations

M. S. A. Heikkinen and N. H. Harley — 721 Experimental investigation of sintered porous metal filters

K. W. Stapleton, E. Guentsch, M. K. Hoskinson and W. H. Finlay — 739 On the suitability of k–ε turbulence modeling for aerosol deposition in the mouth and throat: a comparison with experiment

B.-A. Zucker, A. M. Draz and W. Müller — 751 Comparison of filtration and impingement for sampling airborne endotoxin

NUMBER 7

M. Gamero-Castaño and J. Fernández de la Mora — 757 A condensation nucleus counter (CNC) sensitive to singly charged sub-nanometer particles

J. Yang, R. Jaenicke, V. Dreiling and T. Peter — 773 Rapid condensational growth of particles in the inlet of particle sizing instruments

S. Borrmann, B. Luo and M. Mishchenko — 789 Application of the T-matrix method to the measurement of aspherical (ellipsoidal) particles with forward scattering optical particle counters

J. Heintzenberg and M. Bussemer — 801 Development and application of a spectral light absorption photometer for aerosol and hydrosol samples

C. A. Dunbar and A. J. Hickey — 813 Evaluation of probability density functions to approximate particle size distributions of representative pharmaceutical aerosols

X. Guan and T. B. Martonen — 833 Flow transition in bends and applications to airways

S. R. Kaye, C. G. Phillips and C. P. Winlove — 849 Measurement of non-uniform aerosol deposition patterns in the conducting airways of the porcine lung

Short Communication

S. Lekhtmakher and M. Shapiro — 867 On the paper "inverse methods for analyzing aerosol spectrometer measurements: a critical review"

NUMBER 8

875 Obituary

A. A. Onischuk, A. I. Levykin, V. P. Strunin, M. A. Ushakova, R. I. Samoilova, K. K. Sabelfeld and V. N. Panfilov — 879 Aerosol formation under heterogeneous/homogeneous thermal decomposition of silane: experiment and numerical modeling

T. Zarutskaya and M. Shapiro — 907 Capture of nanoparticles by magnetic filters

I. G. Loscertales — 923 Mass diameter versus aerodynamic diameter of nanoparticles. Implications on the calibration curve of an inertial impactor

R. Mavliev and H.-C. Wang — 933 Design and performance characteristics of a turbulent mixing condensation nuclei counter

Y. Liu and P. H. Daum — 945 The effect of refractive index on size distributions and light scattering coefficients derived from optical particle counters

C. Housiadas, F. E. Larrodé and Y. Drossinos — 959 Convective diffusion in a tube with non-uniform inlet conditions

E. Jankowska, T. Reponen, K. Willeke, S. A. Grinshpun and K.-J. Choi — 969 Collection of fungal spores on air filters and spore reentrainment from filters into air

A. Tippe and A. Tsuda — 979 Recirculating flow in an expanding alveolar model: experimental evidence of flow-induced mixing of aerosols in the pulmonary acinus

S. Weber, P. Hoffmann, J. Ensling, A. N. Dedik, S. Weinbruch, G. Miehe, P. Gütlich and H. M. Ortner — 987 Characterization of iron compounds from urban and rural aerosol sources

NUMBER 9

PART SPECIAL ISSUE: Current Topics in Nuclear Aerosols

Guest Editor: *Denis Boulaud*

H.-W. Chiang — 999 A model for the removal of water droplet aerosols from a flashing jet impinging onto a plate

M. K. Koch, A. Voßnacke, J. Starflinger, W. Schütz and H. Unger — 1015 Radionuclide re-entrainment at bubbling water pool surfaces

A. Auvinen, K. E. J. Lehtinen, J. Enriquez, J. K. Jokiniemi and R. Zilliacus — 1029 Vaporisation rates of CsOH and CsI in conditions simulating a severe nuclear accident

A. Hidaka, H. Shibazaki, T. Yoshino and J. Sugimoto — 1045 Deposition of cesium iodide particles in bends and sections of vertical pipe under severe accident conditions

E. Hontañón, A. de los Reyes and J. A. Capitão — 1061 The CÆSAR code for aerosol resuspension in turbulent pipe flows. Assessment against the storm experiments

REGULAR PAPERS

J. Cho and M. Choi 1077 Determination of number density, size and morphology of aggregates in coflow diffusion flames using light scattering and local sampling

L. Ma, D. B. Ingham and X. Wen 1097 Numerical modelling of the fluid and particle penetration through small sampling cyclones

1121 Book review

1123 Announcement

NUMBER 10

1125 Obituary

D. R. Collins, A. Nenes, R. C. Flagan and J. H. Seinfeld 1129 The scanning flow DMA

D. Lee and M. Choi 1145 Control of size and morphology of nano particles using CO_2 laser during flame synthesis

P. D. Noymer and M. Garel 1165 Stability and atomization characteristics of electrohydrodynamic jets in the cone-jet and multi-jet modes

F. Zheng, M. L. Laucks and E. J. Davis 1173 Aerodynamic particle size measurement by electrodynamic oscillation techniques

S. J. Dunnett and J. H. Vincent 1187 A Mathematical study of aerosol sampling by an idealised blunt sampler oriented at an angle to the wind: the role of gravity

F.-G. Fan and G. Ahmadi 1205 Wall deposition of small ellipsoids from turbulent air flows—a Brownian dynamics simulation

M. A. Peñaloza M. 1231 An alternative method of studying the optical properties of highly non-absorbing spherical monodisperse aerosol using a cell transmissometer

J. S. Fleming, J. H. Conway, S. T. Holgate, A. G. Bailey and T. B. Martonen 1251 Comparison of methods for deriving aerosol deposition by airway generation from three-dimensional radionuclide imaging

NUMBER 11

1261 Obituary

A. A. Onischuk, A. I. Levykin, V. P. Strunin, K. K. Sabelfeld and V. N. Panfilov 1263 Aggregate formation under homogeneous silane thermal decomposition

S. T. Martin, J. Yu, J.-H. Han, M. Verdier, J. Li and P. R. Buseck — 1283 An aerosol chemical reactor for coating metal oxide particles with $(NH_4)_2SO_4$–H_2SO_4–H_2O—part 2: manipulation of the metal oxide core

J. Kuśmierczyk-Michulec and R. Marks — 1299 The influence of sea-salt aerosols on the atmospheric extinction over the Baltic and the north seas

J. Moldanova and E. Ljungström — 1317 Modelling of particle formation from NO_3 oxidation of selected monoterpenes

D. J. Phares, G. T. Smedley and R. C. Flagan — 1335 Effect of particle size and material properties on aerodynamic resuspension from surfaces

X. Wen and D. B. Ingham — 1355 Aspiration efficiency of a thin-walled cylindrical aerosol sampler at yaw orientations with respect to the wind

M. Rapp — 1367 Capture rates of electrons and positive ions by mesospheric aerosol particles

D. Pnueli, C. Gutfinger, L. Moldavsky, K. Shuster and M. Fichman — 1371 Electrostatic porous filter with a blocking electrode

1381 The 15th French Aerosol Conference by ASFERA

NUMBER 12

K. S. Seol, Y. Tsutatani, R. P. Camata, J. Yabumoto, S. Isomura, Y. Okada, K. Okuyama and K. Takeuchi — 1389 A differential mobility analyzer and a Faraday cup electrometer for operation at 200–930 Pa pressure

W. T. McDermott and R. C. Ockovic — 1397 A condensation nucleus counter for chemically reactive gases

L. C. Kenny and R. A. Gussman — 1407 A direct approach to the design of cyclones for aerosol-monitoring applications

Y. Ding and P. Koutrakis — 1421 Development of a dichotomous slit nozzle virtual impactor

A. Voutilainen, F. Stratmann and J. P. Kaipio — 1433 A non-homogeneous regularization method for the estimation of narrow aerosol size distributions

D. L. Bartley, A. B. Martinez, P. A. Baron, D. R. Secker and E. Hirst — 1447 Droplet distortion in accelerating flow

I. González, T. L. Hoffmann and J. A. Gallego — 1461 Precise measurements of particle entrainment in a standing-wave acoustic field between 20 and 3500 Hz

M. D. Guasta and S. Marini 1469 On the retrieval of urban aerosol mass concentration by a 532 and 1064 nm LIDAR

Technical Note

B. Wehner, A. Wiedensohler and J. Heintzenberg 1489 Submicrometer aerosol size distributions and mass concentration of the Millennium fireworks 2000 in Leipzig, Germany
